Meeting Information:

This meeting will provide background information on the Airport Master Plan Update as well as allow the public to participate in the planning process.

The meeting will begin with a brief presentation about the Master Plan Update goals and objectives, process, schedule, and outline the project's outreach program. Following the presentation, attendees can provide a comment and interface with the project team.

Public information meetings for local residents, airport users, business owners, and any other interested parties to learn about and receive updates on the BGM Airport Master Plan Update and potential subsequent efforts. This is a key opportunity to interact with the project team, as well as to provide input before finalization of the Master Plan Update.

The final products of the Master Plan Update project are the official planning documents for the airport: An Airport Master Plan Update and Airport Layout Plan, which guide the future development at the airport. The Master Plan Update includes the current and proposed layout, financial plans, schedules for planned work, the assessment of alternatives on technical, environmental, and economic grounds, and ultimately establishes a framework for the future of the airport.

Engagement with the community will be an important component of ensuring that the Master Plan Update is a transparent process. BGM has also established Technical Advisory Committees, comprised of a wide range of stakeholders, that have helped guide the Master Plan Update process.

For more information about the Master Plan Update, please contact the Greater Binghamton Airport Administration at 607-763-4471.
